Lectures in Abstract Algebra: III. Theory of Fields and Galois Theory (Graduate Texts in Mathematics) N. Jacobson

The present volume completes the series of texts on algebra which the author began more than ten years ago. The account of field theory and Galois theory which we give here is based on the notions and results of general algebra which appear in our first volume and on the more elementary parts of the second volume, dealing with linear algebra. The level of the present work is roughly the same as that of Volume II. In preparing this book we have had a number of objectives in mind. First and foremost has been that of presenting the basic field theory which is essential for an understanding of modern algebraic number theory, ring theory, and algebraic geometry. The parts of the book concerned with this aspect of the subject are Chapters I, IV, and V dealing respectively with finite dimensional field extensions and Galois theory, general structure theory of fields, and valuation theory. Also the results of Chapter III on abelian extensions, although of a somewhat specialized nature, are of interest in number theory. A second objective of our account has been to indicate the links between the present theory of fields and the classical problems which led to its development.

From reader reviews:

Kevin Gans:

Hey guys, do you want to find a new book you just read? Maybe the book with the subject Lectures in Abstract Algebra: III. Theory of Fields and Galois Theory (Graduate Texts in Mathematics) suitable to you? Often the book was written by well-known writer in this era. The actual book titled Lectures in Abstract Algebra: III. Theory of Fields and Galois Theory (Graduate Texts in Mathematics) is a single of several books which everyone read now. This specific book was inspired lots of people in the world. When you read this book you will enter the new shape that you ever know ahead of. The author explained their plan in the simple way, and so all of people can easily to recognise the core of this publication. This book will give you a lots of information about this world now. In order to see the represented of the world on this book.

Lauren Joseph:

Do you really one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Aim to pick one book that you never know the inside because don't ascertain book by its cover may doesn't work at this point is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside look likes. Maybe your answer is usually Lectures in Abstract Algebra: III. Theory of Fields and Galois Theory (Graduate Texts in Mathematics) why because the fantastic cover that make you consider about the content will not disappoint anyone. The inside or content will be fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.

Willie Burroughs:

Are you kind of busy person, only have 10 or 15 minute in your day time to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book compared to can satisfy your limited time to read it because this all time you only find e-book that need more time to be read. Lectures in Abstract Algebra: III. Theory of Fields and Galois Theory (Graduate Texts in Mathematics) can be your answer because it can be read by a person who have those short spare time problems.

Linda Bryant:

You will get this Lectures in Abstract Algebra: III. Theory of Fields and Galois Theory (Graduate Texts in Mathematics) by visit the bookstore or Mall. Just simply viewing or reviewing it may to be your solve issue if you get difficulties on your knowledge. Kinds of this publication are various. Not only by simply written or printed but in addition can you enjoy this book simply by e-book. In the modern era like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose suitable ways for you.
