Text entry has never been so important as it is today. This is in large part due to the phenomenal, relatively recent success of mobile computing, text messaging on mobile phones, and the proliferation of small devices like the Blackberry and Palm Pilot. Compared with the recent past, when text entry was primarily through the standard "qwerty" keyboard, people today use a diverse array of devices with the number and variety of such devices ever increasing.

The variety is not just in the devices, but also in the technologies used: Entry modalities have become more varied and include speech recognition and synthesis, handwriting recognition, and even eye-tracking using image processing on web-cams. Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry-increasingly, the way people communicate.

This book consists of four parts, and covers these areas: Guidelines for Designing Better Entry Systems (including research methodologies, measurement, and language modelling); Devices and Modalities; Languages of the world and entry systems in those languages; and variety in users and their difficulties with text entry-and the possible design and guideline solutions for those individual user groups.

This book covers different aspects of text entry systems and offers prospective researchers and developers

* global guidelines for conducting research on text entry, in terms of design strategy, evaluation methodology, and requirements;

* history and current state of the art of entry systems, including coverage of recent research topics;

* specific guidelines for designing entry systems for a specific target, depending on devices, modalities, language, and different physical conditions of users

From reader reviews:

Eric Lowe:

Here thing why this Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) are different and trusted to be yours. First of all reading through a book is good nevertheless it depends in the content of the usb ports which is the content is as tasty as food or not. Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) giving you information deeper including different ways, you can find any publication out there but there is no publication that similar with Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies). It gives you thrill looking at journey, its open up your own eyes about the thing in which happened in the world which is probably can be happened around you. It is easy to bring everywhere like in playground, café, or even in your way home by train. In case you are having difficulties in bringing the branded book maybe the form of Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) in e-book can be your choice.

Katrina Varga:

You will get this Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) by look at the bookstore or Mall. Just simply viewing or reviewing it may to be your solve difficulty if you get difficulties for ones knowledge. Kinds of this publication are various. Not only simply by written or printed but also can you enjoy this book simply by e-book. In the modern era just like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose correct ways for you.

Sonia Cramer:

A lot of book has printed but it differs. You can get it by online on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by searching from it. It is named of book Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies). You can add your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make an individual happier to read. It is most crucial that, you must aware about guide. It can bring you from one destination for a other place.

Alma Lewis:

Some people said that they feel uninterested when they reading a publication. They are directly felt the item when they get a half regions of the book. You can choose often the book Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) to make your reading is interesting. Your current skill of reading talent is developing when you just like reading. Try to choose very simple book to make you enjoy to read it and mingle the idea about book and reading through especially. It is

to be initially opinion for you to like to open up a book and examine it. Beside that the guide Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) can to be a newly purchased friend when you're truly feel alone and confuse using what must you're doing of these time.
