Bismuth-Containing Compounds (Springer Series in Materials Science)

Bismuth-containing compounds comprise a relatively unexplored materials system that is expected to offer many unique and desirable optoelectronic, thermoelectric, and electronic properties for innovative device applications. This book serves as a platform for knowledge sharing and dissemination of the latest advances in novel areas of bismuth-containing compounds for materials and devices, and provides a comprehensive introduction to those new to this growing field. Coverage of bismides includes theoretical considerations, epitaxial growth, characterization, and materials properties (optical, electrical, and structural). In addition to the well-studied area of highly mismatched Bi-alloys, the book covers emerging topics such as topological insulators and ferroelectric materials. Built upon fundamental science, the book is intended to stimulate interest in developing new classes of semiconductor and thermoelectric materials that exploit the properties of Bismuth. Application areas for bismide materials include laser diodes for optical communications, DVD systems, light-emitting diodes, solar cells, transistors, quantum well lasers, and spintronic devices.

From reader reviews:

Andrew Parker:

Now a day folks who Living in the era where everything reachable by connect with the internet and the resources included can be true or not demand people to be aware of each details they get. How a lot more to be smart in acquiring any information nowadays? Of course the reply is reading a book. Looking at a book can help folks out of this uncertainty Information especially this Bismuth-Containing Compounds (Springer Series in Materials Science) book because book offers you rich data and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it everbody knows.

Cheryl Estrella:

This Bismuth-Containing Compounds (Springer Series in Materials Science) are reliable for you who want to certainly be a successful person, why. The main reason of this Bismuth-Containing Compounds (Springer Series in Materials Science) can be on the list of great books you must have will be giving you more than just simple examining food but feed an individual with information that probably will shock your preceding knowledge. This book is usually handy, you can bring it all over the place and whenever your conditions in e-book and printed people. Beside that this Bismuth-Containing Compounds (Springer Series in Materials Science) giving you an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we understand it useful in your day action. So , let's have it appreciate reading.

Shawn Hernandez:

The particular book Bismuth-Containing Compounds (Springer Series in Materials Science) will bring someone to the new experience of reading some sort of book. The author style to describe the idea is very unique. If you try to find new book you just read, this book very suitable to you. The book Bismuth-Containing Compounds (Springer Series in Materials Science) is much recommended to you to study. You can also get the e-book from the official web site, so you can more readily to read the book.

Trudy Clark:

In this age globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. Often the book that recommended to you personally is Bismuth-Containing Compounds (Springer Series in Materials Science) this book consist a lot of the information on the condition of this world now. This kind of book was represented how do the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. Often the writer made some study when he makes this book. Honestly, that is why this book ideal all of you.
