Les 3 lois de la robotique: Faut-il avoir peur des robots ? (French Edition) Jean-Claude Heudin

Dès que l'on parle des robots, la réaction la plus courante est celle d'une interrogation sur l'avenir avec une angoisse latente de voir un jour les machines supplanter l'homme et même de le faire disparaître. Jean-Claude Heudin examine les origines historiques et culturelles de ce sentiment et nous montre qu'il ne reflète pas la réalité de la robotique. Néanmoins, en s'appuyant sur une réflexion à propos des lois de la robotique proposées par l'écrivain de science-fiction Isaac Asimov, il met en évidence la nécessité d'une réflexion éthique, individuelle et collective, resituant l'homme au centre de la robotique et, plus généralement, des sciences et technologies.
