Foundational Issues in Human Brain Mapping (MIT Press)

Foundational Issues in Human Brain Mapping (MIT Press)

The field of neuroimaging has reached a watershed. Brain imaging research has been the source of many advances in cognitive neuroscience and cognitive science over the last decade, but recent critiques and emerging trends are raising foundational issues of methodology, measurement, and theory. Indeed, concerns over interpretation of brain maps have created serious controversies in social neuroscience, and, more important, point to a larger set of issues that lie at the heart of the entire brain mapping enterprise. In this volume, leading scholars -- neuroimagers and philosophers of mind -- reexamine these central issues and explore current controversies that have arisen in cognitive science, cognitive neuroscience, computer science, and signal processing. The contributors address both statistical and dynamical analysis and modeling of neuroimaging data and interpretation, discussing localization, modularity, and neuroimagers' tacit assumptions about how these two phenomena are related; controversies over correlation of fMRI data and social attributions (recently characterized for good or ill as "voodoo correlations"); and the standard inferential design approach in neuroimaging. Finally, the contributors take a more philosophical perspective, considering the nature of measurement in brain imaging, and offer a framework for novel neuroimaging data structures (effective and functional connectivity -- "graphs").

Contributors: William Bechtel, Bharat Biswal, Matthew Brett, Martin Bunzl, Max Coltheart, Karl J. Friston, Joy J. Geng, Clark Glymour, Kalanit Grill-Spector, Stephen José Hanson, Trevor Harley, Gilbert Harman, James V. Haxby, Rik N. Henson, Nancy Kanwisher, Colin Klein, Richard Loosemore, Sébastien Meriaux, Chris Mole, Jeanette A. Mumford, Russell A. Poldrack, Jean-Baptiste Poline, Richard C. Richardson, Alexis Roche, Adina L. Roskies, Pia Rotshtein, Rebecca Saxe, Philipp Sterzer, Bertrand Thirion, Edward Vul

From reader reviews:

Lois Araiza:

As people who live in the particular modest era should be change about what going on or info even knowledge to make these individuals keep up with the era that is always change and make progress. Some of you maybe may update themselves by reading through books. It is a good choice for you personally but the problems coming to anyone is you don't know what type you should start with. This Foundational Issues in Human Brain Mapping (MIT Press) is our recommendation to make you keep up with the world. Why, since this book serves what you want and need in this era.

Arthur Furr:

Foundational Issues in Human Brain Mapping (MIT Press) can be one of your starter books that are good idea. All of us recommend that straight away because this publication has good vocabulary that can increase your knowledge in language, easy to understand, bit entertaining but delivering the information. The copy writer giving his/her effort that will put every word into enjoyment arrangement in writing Foundational Issues in Human Brain Mapping (MIT Press) but doesn't forget the main level, giving the reader the hottest and also based confirm resource data that maybe you can be considered one of it. This great information can easily drawn you into brand-new stage of crucial thinking.

Beth French:

With this era which is the greater man or woman or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple method to have that. What you need to do is just spending your time very little but quite enough to possess a look at some books. One of many books in the top collection in your reading list is definitely Foundational Issues in Human Brain Mapping (MIT Press). This book that is certainly qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking up and review this publication you can get many advantages.

Maxine Whitley:

A lot of e-book has printed but it differs from the others. You can get it by online on social media. You can choose the best book for you, science, amusing, novel, or whatever by means of searching from it. It is named of book Foundational Issues in Human Brain Mapping (MIT Press). Contain your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make you actually happier to read. It is most important that, you must aware about guide. It can bring you from one destination to other place.
