## Computational Social Network Analysis: Trends, Tools and Research Advances (Computer Communications and Networks)

Social networks provide a powerful abstraction of the structure and dynamics of diverse kinds of people or people-to-technology interaction. Web 2.0 has enabled a new generation of web-based communities, social networks, and folksonomies to facilitate collaboration among different communities.

This unique text/reference compares and contrasts the ethological approach to social behavior in animals with web-based evidence of social interaction, perceptual learning, information granulation, the behavior of humans and affinities between web-based social networks. An international team of leading experts present the latest advances of various topics in intelligent-social-networks and illustrates how organizations can gain competitive advantages by applying the different emergent techniques in real-world scenarios. The work incorporates experience reports, survey articles, and intelligence techniques and theories with specific network technology problems.

Topics and Features: Provides an overview social network tools, and explores methods for discovering key players in social networks, designing self-organizing search systems, and clustering blog sites, surveys techniques for exploratory analysis and text mining of social networks, approaches to tracking online community interaction, and examines how the topological features of a system affects the flow of information, reviews the models of network evolution, covering scientific co-citation networks, nature-inspired frameworks, latent social networks in e-Learning systems, and compound communities, examines the relationship between the intent of web pages, their architecture and the communities who take part in their usage and creation, discusses team selection based on members' social context, presents social network applications, including music recommendation and face recognition in photographs, explores the use of social networks in web services that focus on the discovery stage in the life cycle of these web services.

This useful and comprehensive volume will be indispensable to senior undergraduate and postgraduate students taking courses in Social Intelligence, as well as to researchers, developers, and postgraduates interested in intelligent-social-networks research and related areas.

### **From reader reviews:**

#### **Sheri Furlong:**

As people who live in often the modest era should be change about what going on or information even knowledge to make all of them keep up with the era which is always change and advance. Some of you maybe can update themselves by reading books. It is a good choice in your case but the problems coming to you is you don't know what type you should start with. This Computational Social Network Analysis: Trends, Tools and Research Advances (Computer Communications and Networks) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

#### **Carrie Porter:**

Reading a reserve can be one of a lot of action that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new data. When you read a guide you will get new information mainly because book is one of many ways to share the information as well as their idea. Second, examining a book will make an individual more imaginative. When you reading a book especially fictional works book the author will bring you to definitely imagine the story how the figures do it anything. Third, you may share your knowledge to other people. When you read this Computational Social Network Analysis: Trends, Tools and Research Advances (Computer Communications and Networks), you may tells your family, friends as well as soon about yours book. Your knowledge can inspire the others, make them reading a e-book.

#### **Kenneth Hill:**

Reading a guide tends to be new life style in this particular era globalization. With examining you can get a lot of information that can give you benefit in your life. Along with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their particular reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their skill in writing, they also doing some analysis before they write with their book. One of them is this Computational Social Network Analysis: Trends, Tools and Research Advances (Computer Communications and Networks).

#### **Wendy Miller:**

Don't be worry when you are afraid that this book will certainly filled the space in your house, you may have it in e-book means, more simple and reachable. This Computational Social Network Analysis: Trends, Tools and Research Advances (Computer Communications and Networks) can give you a lot of pals because by you looking at this one book you have factor that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This book offer you information that might

be your friend doesn't know, by knowing more than other make you to be great people. So , why hesitate?  
We need to have Computational Social Network Analysis: Trends, Tools and Research Advances (Computer Communications and Networks).
