Mark Paterson

**The Senses of Touch: Haptics, Affects and Technologies (Senses and Sensibilities)** Mark Paterson

Problems of touch and tactility run as a continuous thread in philosophy, psychology, medical writing and representations in art, from Ancient Greece to the present day. Not merely immediate skin sensation, touching and feeling are inextricably woven into embodied experiences that are emotional and expressive, personal and interpersonal, and mediated through technologies. Examining the role of touch in art, memory, digital design, developmental psychology, experiences of visual impairment, and tactile therapies, *The Senses of Touch* demonstrates the varieties of sensory experience, and explores the diverse range of our "senses" of touch.
