Energetic Nanomaterials: Synthesis, Characterization, and Application

Energetic Nanomaterials: Synthesis, Characterization, and Application

Energetic Nanomaterials: Synthesis, Characterization, and Application provides researchers in academia and industry the most novel and meaningful knowledge on nanoenergetic materials, covering the fundamental chemical aspects from synthesis to application.

This valuable resource fills the current gap in book publications on nanoenergetics, the energetic nanomaterials that are applied in explosives, gun and rocket propellants, and pyrotechnic devices, which are expected to yield improved properties, such as a lower vulnerability towards shock initiation, enhanced blast, and environmentally friendly replacements of currently used materials.

The current lack of a systematic and easily available book in this field has resulted in an underestimation of the input of nanoenergetic materials to modern technologies. This book is an indispensable resource for researchers in academia, industry, and research institutes dealing with the production and characterization of energetic materials all over the world.

- Written by high-level experts in the field of nanoenergetics
- Covers the hot topic of energetic nanomaterials, including nanometals and their applications in nanoexplosives
- Fills a gap in energetic nanomaterials book publications

From reader reviews:

Robert Gibson:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a publication. Beside you can solve your condition; you can add your knowledge by the guide entitled Energetic Nanomaterials: Synthesis, Characterization, and Application. Try to the actual book Energetic Nanomaterials: Synthesis, Characterization, and Application as your pal. It means that it can to get your friend when you really feel alone and beside those of course make you smarter than previously. Yeah, it is very fortunated for you. The book makes you a lot more confidence because you can know every thing by the book. So , let me make new experience as well as knowledge with this book.

Micah Stahlman:

Now a day individuals who Living in the era wherever everything reachable by connect to the internet and the resources inside it can be true or not demand people to be aware of each data they get. How many people to be smart in getting any information nowadays? Of course the correct answer is reading a book. Reading a book can help persons out of this uncertainty Information specially this Energetic Nanomaterials: Synthesis, Characterization, and Application book as this book offers you rich details and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you probably know this.

Joshua Parsons:

The knowledge that you get from Energetic Nanomaterials: Synthesis, Characterization, and Application could be the more deep you rooting the information that hide inside words the more you get thinking about reading it. It doesn't mean that this book is hard to know but Energetic Nanomaterials: Synthesis, Characterization, and Application giving you excitement feeling of reading. The author conveys their point in certain way that can be understood by anyone who read this because the author of this publication is well-known enough. This specific book also makes your own vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We advise you for having this specific Energetic Nanomaterials: Synthesis, Characterization, and Application instantly.

Shawn Howe:

Information is provisions for folks to get better life, information presently can get by anyone from everywhere. The information can be a understanding or any news even an issue. What people must be consider when those information which is inside the former life are challenging be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you have the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All of those possibilities will not happen in you if you take Energetic Nanomaterials: Synthesis, Characterization, and Application as your daily resource information.
