Want to become a human lie detector?

Everybody lies; there is no doubt about it. If you were once forced to undergo unnecessary suffering because of the lies of another person and you do not want it to happen again (to you or to the people you care about) then you need to learn how to become an expert lie spotter.

You do not need to be psychic in order to weed out deception from people, you only need a sharp eye, a bit of patience, and to not be easily distracted; if you have these qualities then you are already halfway to becoming a real human lie detector. All you need now is to know about the mechanics of lying, like what causes people to lie, and what kinds of behavioural patterns you need to keep an eye out for.

You may think that it is impossible to tell when a person is lying without the help of a polygraph machine; well, it is hard, but it is certainly not impossible for a human being to discern deception. With the right skills and a little practice, you can actually become as accurate as the best lie detecting machines out there!

In this book you will learn a couple of useful hints and tips that can help you discern if the person whom you are talking to is being honest with you, or if every word that came out of his/her mouth is tainted with deceit. You can protect yourself and the people who you hold most dear just by mastering the skills mentioned in this short, yet concise book.
