Book Riding. Creative Readings and Writings in Physics and Psychology Remus Gogu

Book Riding deals with the biggest obstacle to valuable lay contributions in science: the fear that science is a domain belonging solely to experts. While this argument rests on valid premises, *Book Riding* aims to provide both the engine (method) and the fuel (ideas) needed by amateur science enthusiasts to explore and generate new ideas in the fields of physics and psychology.

Promoting an enlightening methodology –critically reading a plethora of books—to generate new ideas, *Book Riding* primarily applies this method in physics and psychology, exploring subjects ranging from the subconscious mind to parallel universes. Author Remus Gogu deftly explains his reading-as-inquiry method in his own text, encouraging readers to scan randomly for topics that may pique their interest, then develop step-by-step their insights, despite not being experts. Gogu provides a personal example of this method, as he himself, though not an expert, brings pertinent insights in physics and psychology—a position that, he argues, can have unique value.

Filled with short physics and psychology essays that you can read on your way to school or work, the book hones in on the objective of getting the reader to look through radically altered paradigms at the definition of life and the binding concepts of the world in which we live. The author's fluid yet poignant writing style is reader-friendly, unpretentious, and not overly academic. *Book Riding* doesn't take itself too seriously, and as such it's both fun and inspiring. Humorous at times in its examining of heavy ideas, this book will appeal widely, from high school students to any open-minded individuals interested in these gripping topics.

Gogu quotes Sarah Ban Breathnach as stating, “The world needs dreamers and the world needs doers. But above all, the world needs dreamers who do.” Ultimately, this is the goal of *Book Riding* as a means of inspiring the reader to think great thoughts and dare great dreams.

From reader reviews:

George Cardenas:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite guide and reading a e-book. Beside you can solve your problem; you can add your knowledge by the e-book entitled Book Riding. Creative Readings and Writings in Physics and Psychology. Try to the actual book Book Riding. Creative Readings and Writings in Physics and Psychology as your close friend. It means that it can for being your friend when you feel alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated in your case. The book makes you considerably more confidence because you can know almost everything by the book. So , we should make new experience and knowledge with this book.

Heidi Odom:

Are you kind of busy person, only have 10 or maybe 15 minute in your moment to upgrading your mind skill or thinking skill possibly analytical thinking? Then you have problem with the book compared to can satisfy your short period of time to read it because all this time you only find reserve that need more time to be examine. Book Riding. Creative Readings and Writings in Physics and Psychology can be your answer as it can be read by an individual who have those short spare time problems.

Harry Keller:

Many people spending their time by playing outside having friends, fun activity using family or just watching TV the entire day. You can have new activity to invest your whole day by looking at a book. Ugh, ya think reading a book can definitely hard because you have to accept the book everywhere? It all right you can have the e-book, having everywhere you want in your Smartphone. Like Book Riding. Creative Readings and Writings in Physics and Psychology which is getting the e-book version. So , try out this book? Let's find.

Rene Hudson:

You can get this Book Riding. Creative Readings and Writings in Physics and Psychology by go to the bookstore or Mall. Just simply viewing or reviewing it could to be your solve trouble if you get difficulties on your knowledge. Kinds of this publication are various. Not only simply by written or printed but also can you enjoy this book by simply e-book. In the modern era similar to now, you just looking by your local mobile phone and searching what their problem. Right now, choose your current ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose proper ways for you.
