Capital: An Abridged Edition (The World's Classics) Karl Marx

A classic of early modernism, *Capital* combines vivid historical detail with economic analysis to produce a bitter denunciation of mid-Victorian capitalist society. It has proved to be the most influential work in twentieth-century social science; Marx did for social science what Darwin had done for biology.

This is the only abridged edition to take into account the whole of *Capital*. It offers virtually all of Volume 1, which Marx himself published in 1867; excerpts from a new translation of "The Result of the Immediate Process Production"; and a selection of key chapters from Volume 3, which Engels published in 1895.
