Simulation (Context Architecture) Andrea Gleiniger

Digitalization has transformed the discourse of architecture: that discourse is now defined by a wealth of new terms and concepts that previously either had no meaning, or had different meanings, in the context of architectural theory and design. Its concepts and strategies are increasingly shaped by influences emerging at the intersection with scientific and cultural notions from modern information technology. The new series Context Architecture seeks to take a critical selection of concepts that play a vital role in the current discourse and put them up for discussion. In the context of discussions of the medial, the notion of simulation plays a central role in architecture as illusion and imitation. In dialogue with information technology and computer science, however, that notion has now taken on a new quality in architectural discourse. Today when we speak of simulation we primarily think of ""computer simulation,"" the technical ability to simulate processes. Whereas simulation used to refer to a mode of presentation, it now connects architecture with the sciences and represents a strategic and methodological instrument, a tool of discovery. With the scientific principle of simulation the focus shifts to the idea of ""modeling a dynamic system"" (Norbert Wiener), not just presenting finished products but going in search of solutions and developing systems!

From reader reviews:

Danielle Smith:

What do you think about book? It is just for students since they're still students or it for all people in the world, what best subject for that? Only you can be answered for that question above. Every person has diverse personality and hobby per other. Don't to be forced someone or something that they don't would like do that. You must know how great along with important the book Simulation (Context Architecture). All type of book is it possible to see on many methods. You can look for the internet methods or other social media.

Joe Hessler:

What do you in relation to book? It is not important to you? Or just adding material when you really need something to explain what the ones you have problem? How about your time? Or are you busy man? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Every individual has many questions above. They have to answer that question simply because just their can do that will. It said that about book. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need this Simulation (Context Architecture) to read.

Michael Farrell:

In this 21st centuries, people become competitive in every single way. By being competitive currently, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. Yep, by reading a publication your ability to survive boost then having chance to stand than other is high. For you who want to start reading some sort of book, we give you this kind of Simulation (Context Architecture) book as beginning and daily reading e-book. Why, because this book is usually more than just a book.

Nick McAllister:

Precisely why? Because this Simulation (Context Architecture) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will zap you with the secret the item inside. Reading this book adjacent to it was fantastic author who all write the book in such amazing way makes the content on the inside easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of positive aspects than the other book possess such as help improving your talent and your critical thinking approach. So , still want to delay having that book? If I ended up you I will go to the e-book store hurriedly.
