Hong Cheng

Sparse Representation, Modeling and Learning in Visual Recognition: Theory, Algorithms and Applications (Advances in Computer Vision and Pattern Recognition) Hong Cheng

This unique text/reference presents a comprehensive review of the state of the art in sparse representations, modeling and learning. The book examines both the theoretical foundations and details of algorithm implementation, highlighting the practical application of compressed sensing research in visual recognition and computer vision. Topics and features: describes sparse recovery approaches, robust and efficient sparse representation, and large-scale visual recognition; covers feature representation and learning, sparsity induced similarity, and sparse representation and learning-based classifiers; discusses low-rank matrix approximation, graphical models in compressed sensing, collaborative representation-based classification, and high-dimensional nonlinear learning; includes appendices outlining additional computer programming resources, and explaining the essential mathematics required to understand the book.

From reader reviews:

Patrick Sherman:

Have you spare time for a day? What do you do when you have far more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a go walking, shopping, or went to the actual Mall. How about open or even read a book titled Sparse Representation, Modeling and Learning in Visual Recognition: Theory, Algorithms and Applications (Advances in Computer Vision and Pattern Recognition)? Maybe it is for being best activity for you. You already know beside you can spend your time along with your favorite's book, you can better than before. Do you agree with it has the opinion or you have various other opinion?

Peter Wright:

Beside that Sparse Representation, Modeling and Learning in Visual Recognition: Theory, Algorithms and Applications (Advances in Computer Vision and Pattern Recognition) in your phone, it can give you a way to get closer to the new knowledge or data. The information and the knowledge you can got here is fresh from your oven so don't end up being worry if you feel like an old people live in narrow community. It is good thing to have Sparse Representation, Modeling and Learning in Visual Recognition: Theory, Algorithms and Applications (Advances in Computer Vision and Pattern Recognition) because this book offers for your requirements readable information. Do you sometimes have book but you would not get what it's interesting features of. Oh come on, that wil happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss the item? Find this book along with read it from now!

Aletha Bassett:

What is your hobby? Have you heard which question when you got scholars? We believe that that issue was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. So you know that little person like reading or as examining become their hobby. You need to understand that reading is very important and also book as to be the factor. Book is important thing to increase you knowledge, except your own teacher or lecturer. You will find good news or update regarding something by book. Numerous books that can you take to be your object. One of them are these claims Sparse Representation, Modeling and Learning in Visual Recognition: Theory, Algorithms and Applications (Advances in Computer Vision and Pattern Recognition).

Santiago Johnson:

A number of people said that they feel weary when they reading a reserve. They are directly felt that when they get a half parts of the book. You can choose the actual book Sparse Representation, Modeling and Learning in Visual Recognition: Theory, Algorithms and Applications (Advances in Computer Vision and

Pattern Recognition) to make your own reading is interesting. Your own skill of reading talent is developing when you such as reading. Try to choose simple book to make you enjoy to study it and mingle the sensation about book and reading especially. It is to be initial opinion for you to like to open a book and go through it. Beside that the guide Sparse Representation, Modeling and Learning in Visual Recognition: Theory, Algorithms and Applications (Advances in Computer Vision and Pattern Recognition) can to be your friend when you're experience alone and confuse using what must you're doing of this time.
