Deep Space Craft: An Overview of Interplanetary Flight (Springer Praxis Books) Dave Doody

Deep Space Craft opens the door to interplanetary flight. It looks at this world from the vantage point of real operations on a specific mission, and follows a natural trail from the day-to-day working of this particular spacecraft, through the functioning of all spacecraft to the collaboration of the various disciplines to produce the results for which a spacecraft is designed. These results are of course mostly of a scientific nature, although a small number of interplanetary missions are also flown primarily to test and prove new engineering techniques. The author shows how, in order to make sense of all the scientific data coming back to Earth, the need for experiments and instrumentation arises, and follows the design and construction of the instruments through to their placement and testing on a spacecraft prior to launch. Examples are given of the interaction between an instrument's science team and the mission's flight team to plan and specify observations, gather and analyze data in flight, and finally present the results and discoveries to the scientific community.

This highly focused, insider's guide to interplanetary space exploration uses many examples of previous and current endeavors. It will enable the reader to research almost any topic related to spacecraft and to seek the latest scientific findings, the newest emerging technologies, or the current status of a favorite flight. In order to provide easy paths from the general to the specific, the text constantly refers to the Appendices. Within the main text, the intent is general familiarization and categorization of spacecraft and instruments at a high level, to provide a mental framework to place in context and understand any spacecraft and any instrument encountered in the reader's experience.

Appendix A gives illustrated descriptions of many interplanetary spacecraft, some earth-orbiters and ground facilities to reinforce the classification framework. Appendix B contains illustrated detailed descriptions of a dozen scientific instruments, including some ground-breaking engineering appliances that have either already been in operation or are poised for flight. Each instrument's range of sensitivity in wavelengths of light, etc, and its physical principle(s) of operation is described. Appendix C has a few annotated illustrations to clarify the nomenclature of regions and structures in the solar system and the planets' ring systems, and places the solar system in context with the local interstellar environment.

From reader reviews:

Shirley Glover:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each guide has different aim or maybe goal; it means that guide has different type. Some people feel enjoy to spend their the perfect time to read a book. They can be reading whatever they get because their hobby is usually reading a book. Think about the person who don't like reading a book? Sometime, man or woman feel need book if they found difficult problem or even exercise. Well, probably you should have this Deep Space Craft: An Overview of Interplanetary Flight (Springer Praxis Books).

Dolores Parker:

Book is to be different for each and every grade. Book for children till adult are different content. We all know that that book is very important for us. The book Deep Space Craft: An Overview of Interplanetary Flight (Springer Praxis Books) was making you to know about other information and of course you can take more information. It is extremely advantages for you. The publication Deep Space Craft: An Overview of Interplanetary Flight (Springer Praxis Books) is not only giving you a lot more new information but also being your friend when you sense bored. You can spend your own spend time to read your guide. Try to make relationship with the book Deep Space Craft: An Overview of Interplanetary Flight (Springer Praxis Books). You never sense lose out for everything should you read some books.

April Robles:

Reading a book can be one of a lot of activity that everyone in the world really likes. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new facts. When you read a book you will get new information due to the fact book is one of a number of ways to share the information or maybe their idea. Second, studying a book will make anyone more imaginative. When you looking at a book especially fiction book the author will bring you to imagine the story how the character types do it anything. Third, you are able to share your knowledge to others. When you read this Deep Space Craft: An Overview of Interplanetary Flight (Springer Praxis Books), it is possible to tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire average, make them reading a e-book.

Bobbie Burke:

People live in this new day time of lifestyle always aim to and must have the time or they will get large amount of stress from both lifestyle and work. So , once we ask do people have extra time, we will say absolutely without a doubt. People is human not just a robot. Then we consult again, what kind of activity do you have when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the

actual book you have read will be Deep Space Craft: An Overview of Interplanetary Flight (Springer Praxis Books).
