T. Edward Fox, Thomas Hudson

ANNE SWIFT: Making the Molecular Biological Detective: How Anne Douglas Became Anne Swift, Secret FBI Scientist T. Edward Fox, Thomas Hudson

There have been 8 Anne Swift medical mysteries reported plus the interview she gave upon retiring from her work—collected in a trio of trilogies—but not a word about how she became interested in Biology enough to get an undergraduate degree in the subject, and a graduate degree and even a doctorate in the field... and then just gave it up to be a wife and mother. Granted, her son is the famous young inventor, Tom Swift (or will be when he grows up) and her husband is Damon Swift, head of Swift Enterprises. This is the book that takes us along with Anne from the age of about 13 through her days in school, falling in love, marriage and how she was enticed into becoming a super, secret scientist for the FBI. And how she had to keep it all a secret. From EVERYBODY! And how she even helped cure a nasty type of cancer at the age of 18. Plus, her entire first FBI case. So, part biography and part medical mystery, this is how the girl became the woman and what drove her to become one of the top Molecular Biological Detectives around! -----

--- Also available and published in a trio of novella collections, the original Anne Swift stories: Anne Swift and the Microbial Murder Mess Anne Swift and the Nasty Nuclear Nodules Anne Swift and Scary Scroungy Scrofula Anne Swift and the Deadly Dino DNA Anne Swift and the Malicious Meteor Mayhem Anne Swift and the Incendiary Insect Infestation Anne Swift and the Alien Anticoagulant Anomaly Anne Swift: Interview With a MoBiDet Anne Swift and the Pernicious Parasite Pandemic
